

# How to finish the Catalina installation.

1. Use **EasyMBR-Installer1015** to make **Catalina MBR Installer**.  
Install Clover, and setup Clover as `BooterConfig=0x28, CsrActiveConfig=0x67`
2. Boot to **Catalina MBR Installer** first time,  
open **Utilities** -> **Disk Utility**, format as MBR HFS+.  
Install Catalina to blank HFS+ "**Target**" partition.
3. ReBoot to **Catalina MBR Installer** second time after installation is finished,  
open **Utilities** -> **Terminal**, run the script command:  
**copytempdata**
4. Boot to "**Target**" HFS+ partition on **single user mode (-s) terminal**, run the script command:  
**hfsupdatecache**
5. ReBoot to "**Target**" HFS+ partition, setup user name and login, finish the installation.

Please read "Work on 10.15.txt" for the details if you need it.
