

How to update Catalina on MBR HFS+.

1. Use **installScript_1015update** to update **Catalina** on "**Target**" MBR HFS+ partition.

The **installScript_1015update** script will do the following commands.

Rename the old /Volumes/Target/System/Library/Templates/Data to be Data-new-name.

Install the Catalina update.

Ditto the new /Volumes/Target/System/Library/Templates/Data/ to /Volumes/Target/

2. Boot to "**Target**" MBR HFS+ partition on **single user mode (-s)**, run the script command:

hfsupdatecache

3. Reboot to "**Target**" MBR HFS+ partition, finish the update.
