How to finish the Catalina installation.

1. Use **EasyMBR-Installer1015** to make **USB Catalina Installer**.

2. Boot to **USB Catalina Installer**, open **Utilities** -> **Disk Utility**, format as MBR HFS+. Install Catalina to blank MBR HFS+ "**Target**" partition.

3. Boot to **USB Catalina Installer**, open **Utilities** -> **Terminal**, run the script command: **copytempdata**

4. Boot to "**Target**" MBR HFS+ partition on **single user mode (-s)**, run the script command: **hfsupdatecache**

5. Reboot to "**Target**" MBR HFS+ partition, setup user name and login, finish the installation.

Please read "Work on 10.15.txt" for the details if you need it.
Also, you need to setup Clover as BooterConfig=0x28, CsrActiveConfig=0x67
