How to finish the 10.13, 10.14 installation.

1. Use **EasyMBR-Installer1013** to make **USB MBR Installer**.

2. Boot to **USB MBR Installer**, open **Utilities** -> **Disk Utility**, format as MBR HFS+.
   Install High Sierra, Mojave to blank MBR HFS+ "**Target**" partition.

3. Reboot to "**Target**" MBR HFS+ partition, setup user name and login, finish the installation.

4. If your CPU didn't support SSE4.2 like as LGA775 Core 2 Duo E8400,
   and always get 10.14 Mojave reboot during booting "**Target**" system after installation.
   You need to patch com.apple.telemetry first as below.

   Boot to **USB MBR Installer**, open **Utilities** -> **Terminal**, run the script command:
   mojave2core

Please read "Work on 10.13 10.14.txt" for the details if you need it.
Also, you need to setup Clover as BooterConfig=0x28, CsrActiveConfig=0x67
